Activities Report for the Quarter Ended 30 June 2014

Summary

- Red Sky's solar energy business, Soleir, and the Dubbo Solar One Project, are stalled until uncertainty with respect to Federal Government renewable policy is clarified;
- Further opportunities in onshore gas were assessed.

Operational Overview

Solar Opportunity

Red Sky acquired solar energy company, Soleir Limited ("Soleir"), in November 2012 (see ASX announcement, 28 November 2012). Soleir is a developer of utility scale photovoltaic (PV) solar power projects, and its first project is in the major regional city of Dubbo in central NSW.

Funding Structure

The proposed funding structure provides for unitised ownership that will allow individuals to participate in the business and invest in the Dubbo Solar One Project. A product ruling in relation to the proposed funding structure was issued by the Australian Taxation Office on 12th March.

Status

The Federal Government has an ongoing review of the Renewable Energy Target. Given this uncertainty, progress on the Soleir business and the Dubbo Solar One Project is very difficult.

Onshore Gas

With the sale of the Clarence Moreton Basin acreage to ERM Power, the Company is actively assessing onshore gas opportunities in jurisdictions where the regulatory framework is more balanced and based on rigorous risk assessment.
